

CANDLE SAFETY

Your safety is important to us, and we want you to use and enjoy our beautiful Organic Choice candle range safely.

The use of candles requires you to follow some safety steps so please ensure you take note of these candle usage precautions and adhere to them when burning your candles.

- Never leave candle burning unattended or on/near anything that can catch fire.
- Keep out of reach of children.
- Blow out candle and discard when 10mm wax remains in jar or if glass is broken (burning the candle right down the wick below 10mm can cause glass jar to break).
- Ensure wicks are upright and trimmed to 6-10mm during use and each time the candle is relit.
- Glass will be hot during and after use so do not touch.
- Remove match after lighting and extinguish by blowing gently.
- Never introduce liquids or foreign objects into candle and keep it free from wick trimmings, matches and any flammable materials.

For best performance of your candle; do not burn for more than 4 hours or less than 1 hour at a time.

If the glass becomes blackened while burning, extinguish the candle and wipe with a dry cloth once completely cooled.
